## Miscellaneous News

Mr. J. E. Cooley, Mrs. L. Cooley and Mrs. Mortimer left Wednesday for Calgary by motor.

Mr. Holmes is relieving at the C. N. R. Station during Mr. Youell's absence.

Mrs. Belmont and daughter Amelia returned Tuesday from Calgary, where they spent a few days.

Mr. and Mrs. W. A. Todd spent the week end in Calgary and Alderside, returning on Tuesday morning.

Mr. E. Robinson was a Drumheller visitor Tuesday.

Mr. C. W. Rideout was a Hanna visitor last week.

Mr. F. Stevens was a Chinook visitor on Wednesday.

Mr. Andy Carlson owner of the farm one half mile north of town, (formerly known as the Lensnaaf farm) arrived here from Wildmere this week.

Mr. J. W. Shier, arrived home Saturday morning from Quiskiki Lake, where he has been engaged in building for the past few months.

We are pleased to welcome Mr. and Mrs. J. Wright Lawrence and daughter, Peggy, back to Chinook. For the past two years they have resided at Red Deer.

Leonard Youell who has been at Quiskiki Lake for some time, returned Saturday.

## NOTICE

To whom it may concern  
I have not resigned my position and have no intention of doing so this year,  
C. W. Rideout.  
Post Master

## CHANGE IN CANADIAN NATIONAL R.R. TIME TABLE

No. 39 West bound, passenger,  
1.27 a. m. except Monday.  
No. 10 East bound, passenger,  
3.08 a. m. Effective Sunday

## GOOD CLEAN RESTAURANT

Fresh Meat-for sale  
Ice Cream, Confectionary, Soft Drinks  
Meals at reasonable prices.

**MAH BROS.**

## More Effective Insulin Produced

WINNIPEG, April 28—(C.P.)—Research medical scientists at University of Toronto have produced a new insulin preparation more effective in treatment of diabetes than earlier preparations, Dr. H. J. Cody, president of the University, now on a tour of western Canada, told an alumni dinner here.

The new "modification" of insulin is known as zinc protamine insulin, he said. It has been produced on a commercial basis by the Connaut Laboratories, connected with the University, for the past

Mr. T. W. Hunter, Calgary, superintendent of Pioneer Elevators was a Chinook visitor last week.

Born—To Mr. and Mrs. S. Meeres on Wednesday, April 28th, in the Cereal hospital, a son.

Results showed that in most cases diabetics who used the new preparation had longer immunity from diabetic symptoms, and required less frequent injections, Dr. Cody said.

We are again called upon to announce the death of another former, Chinook pioneer Old Timer, in the person of Mrs. Emma widow of the late Lewis Shabino, 3930 Kalso Street, Vancouver, in her 82nd year. Survived by two daughter and two sons, Mrs. B.B. Cooke, of Saskatoon, Mrs. Florence Stafford, of Vancouver, Harold and Ervin, of Vancouver. Funeral service was held Thursday, April 15th, at 1.30 p. m., in the Chapel of the Mount Pleasant undertaking Co. Rev D. A. McKenzie officiating. Interment in Ocean View Burial Park.

## Royal Sponsors Gave Portraits

The Canadian Pacific, on land and sea, is proud of its close contact with Their Majesties, King George VI, and Queen Elizabeth, whose portraits grace two of the company's proudest possessions, the Royal York Hotel in Toronto, and the 20,000 ton Atlantic liner Her Majesty and named for her. The illustration shows the autographed photograph of Their Majesties presented to the liner which was sponsored by the company and named for her. A similar portrait was presented to the huge Toronto hostelry.

## Breaking Their Backs

More than startling are the figures of expenditures being made for war and defence by the nations of the world recently revealed in tabulated form as an annex to an American cartoon captioned "Just Pocket Money".

The irony of the heading is immediately realized when the figures are scanned and analyzed for they show a progressively increasing expenditure by the combined nations of the world from 1933 onward when the total martial bill was \$3,992,000,000 as compared with \$10,730,700,000 for last year and an estimate of least \$12,000,000,000 for the current year.

Roughly the taxpayers of the world are being asked to increase their contributions to the war god by about two billions of dollars every year. The governments of the countries involved are stepping it up every year by about that amount and have been doing so since 1933.

Now such figures as ten or twelve billions of dollars may not convey very much to the comprehension of the average man on the street in the city or the farmer in the country, but a little reflection on the effect of this enormous drain on the resources of the countries involved, present and future, must surely lead to wonderment at the ability of the people to stand such an enormous drain and speculation as to the length of time that must lapse before financial ruin and chaos will overtake the spenders.

A little reflection on the subject must also lead to the conviction that something must be done to avert the threatened catastrophe, whether through a rejuvenated League of Nations or by some other agency, and that nothing is likely to be done except through the leadership of the democratic group of nations.

The present day situation has been brought about by the aggressiveness of some of the nations who are determined to win back what they lost in the war of 1914-18, by fear on the part of other nations who are afraid of what may happen to them as a result of the aggressiveness on the part of their neighbors and by the dictates of prudent and the force of necessity on the part of the remaining nations who see that unless they are armed, purely as a defensive measure, they may become an easy prey in the event of the outbreak of a major conflict despite all desires to remain neutral and pursue the paths of peace.

It is this latter group of nations—the countries which still remain converts to the democratic form of government—represented most powerfully by Great Britain and the United States, which must lead the way in the search for some method to halt this headlong rush towards bankruptcy.

There are some writers who have advanced the theory that the countries espousing the cause of democracy should stand aside and let the protagonists of fascism and communism fight it out among themselves and destroy one another if they want to do it, but this position is untenable in practice for several reasons.

In the first place it is generally agreed by most authorities that democratic reality would be almost impossible in the event of a major conflict between the members of the other groups. It is asserted that, willfully, they would be dragged into the conflict, if not in the early stages at any rate before a conclusion was reached; that circumstances, political or economic, or both, would drag them in against their will.

Moreover, it should be pointed out, despite efforts of some of the countries to make themselves self-contained and self-supporting in the last decade, there is so much inter-dependence in these days of widening exchange and increasing implicity of communications that no groups of important countries could wage warfare without inflicting serious and perhaps irreparable damage on innocent bystanders.

The very fact that Great Britain and the United States have found it necessary to compete in the armaments race is indicative of their recognition of the truth of the foregoing statement.

"What is needed is a new spirit of kinship, a reunion of men and all our peoples of common breed in common purpose," recently said Sir Henry Page Croft at a meeting in Wales urging greater unity between the component parts of the British Empire as a means towards "collective security," when he launched what he called an Empire Unity campaign.

No doubt what Sir Henry Page Croft had to propose on that occasion would serve a useful purpose but the plan might be extended to provide for a common council of all the democratic countries which might be sufficiently powerful to exercise a restraining influence on the activities of those nations which are setting the pace in the armaments race in detriment not only to their own nationals but to those of the democratic countries.

### Long Search Successful

#### Science Has Isolated Vitamin A In Pure Form

Fale yellow needle-shaped crystals of pure vitamin A, 4,000 times more potent than cod liver oil, were shown to the American Chemical Society at Chapel Hill, N.C., in a visual proof of success of a 23-year medical quest—isolation of vitamin A, the third to be obtained in pure form.

Vitamin B, for nerves, and vitamin C, for scurvy, had previously been isolated. A is the disease-protection vitamin, which also helps growth and is important to eyesight.

The new crystals were reported about 1,000,000 units stronger than previously obtained vitamin A concentrates. The vitamin unit is an international standard of measurement. The crystals are 2,000,000 units per gram as compared with about 2,000,000 units for other standard vitamin A concentrates.

### To Protect Regular Shops

Second-class haircuts were five cents apiece and facial treatments only a dime at Victoria following British Columbia regulations regarding barbering trade schools. The man who wants to be a barber must serve 1,000 hours at the above income rates. The move is to prevent schools from competing with regular shops.

International trade began prior to 5000 B.C., according to evidence found in the ruins of the Babylonian city of Kish.

There are only about 400 privately-owned airplanes in England.

## HOW TO OVERCOME ITCHING PILES

If you are annoyed with itching piles or rectal soreness, do not neglect the same or run the risk of an operation. Any itching, soreness or painful passage of stool, is nature's warning, and proper treatment should be secured at once. For this purpose get one of our "Pile Ointment" and use it as directed. This formula, which is used internally, quickly relieves the itching, soreness and aids in healing the sore, tender spots. It is a pleasant to use and is highly recommended. It is easy to use and it saves the patient the expense of an operation when a simple remedy, which is so pleasant to use may be had at such a reasonable cost.

### A Real Magician

#### General Motors Vice-President Cooks Eggs On Ice

Charles F. Kettering, General Motors vice-president in charge of research, showed 1,000 persons in the General Motors Auditorium in Detroit how to fry an egg atop a cube of ice.

The egg was placed in a shiny frying pan. Underneath the frying pan was a folded newspaper, which had been placed on the ice, and underneath the ice was a flat coil which stayed cold during the demonstration.

"Very simple," said Kettering, as he explained that the coil was energized by an electric current with a frequency of 1,600 alternations a second.

The demonstration was part of the first showing of General Motors new road show, "Preview of Progress," which is to be exhibited throughout the United States this year.

### Air Mail Service

#### Department Working Towards Inauguration On July 1st

Hon. C. D. Howe, minister of transport, stated he believed mail service on the trans-Canada airways would start July 1.

"We are still working towards the July 1 opening," he said. "I feel personally, that on that date mail service, at least, will start, with passenger service opening as soon thereafter as possible."

He said landing fields along the Montreal-Vancouver route were in good shape. The schedule was tentatively set at 16 hours between Montreal and Vancouver.

Lockheed-Electra planes, carrying 10 passengers, and the superspeed Lockheed planes, carrying 14 passengers and possibly a hostess, would be used.

### Name Travelled Far

Cecil Ripley of Annerth, Nova Scotia, marked his name on a piece of hardwood a year ago and forgot all about it. The other day he had a letter from Charles Wilson, a chairman in Hoxton, England, who came across the address and wrote to him.

### New X-Ray Machine

#### Great Step In Advance In Making Pictures Of Human Anatomy

A new X-ray machine, which "sees around" bones and takes accurate cross-sections of any tissue of the body at any depth, was demonstrated for the first time to members of the American College of Physicians.

The machine "makes possible what has hitherto been impossible," Dr. Sherwood Moore of the Edward Mallinckrodt Hospital said, since pictures can be made of a layer of tissue to an accuracy of one centimetre, or about one-third of an inch.

X-ray pictures now made are a mass shadow of all the organs of the body or of an entire arm or leg, with many parts partially or wholly obscured.

To demonstrate the delicate focus of the machine, called a "laminagraph," Dr. Moore showed the first picture ever made of the breast bone of a person. Formerly it was impossible to obtain such a picture because the spine obscured the rays. The device also will take an accurate photograph of the marrow through the solid part of a bone or of the spine without interference from the internal organs.

It is theoretically possible, although no such attempts have been made yet because the machine is so new, to photograph any section of the brain, to look at the inside of the liver, stomach, gall bladder or other organ and to locate accurately and determine the condition of tumors, cancers and other growths.

Jean Kieffer, 37-year-old superintendent of the mechanical laboratories of the Connecticut state tuberculosis hospital at Norwich, Conn., invented the apparatus.

### The Human Factor

#### May Be Greatest Handicap In Connection With Air Route

The "human factor" might be the greatest handicap in speedy completion of the trans-Canada air route, J. A. Wilson, Dominion controller of civil aviation, told the Toronto board of trade.

Canadian pilots had been deprived of the opportunity for night flying since abandonment of the earlier trans-Canada service made up of inter-city "hops," Mr. Wilson said. While he believed "we undoubtedly can catch up, the training and educating of pilots flying blind at night on radio beams was a personal factor and infinitely more difficult to surmount" than technical and physical problems.

One of the greatest handicaps in the establishment of the route in Wilson's opinion was, he said, "our overgrown railway system." Earlier attempts were abandoned, he said, to develop faster transportation, so the pioneer flyers turned to the north where developed a fine air service.

### A Young Giant

#### Nineteen-Year-Old Youth Is Eight Feet Nine Inches In Height

Robert Wadlow, 19, the eight-foot-five inches, almost quarter-ton boy of Alton, Ill., was decided to be a normal individual in many respects, differing from other people primarily in the overactivity of his pituitary gland.

In the first of a group of clinics presented for members of the American College of Physicians, Dr. Louis H. Behrens, of Barnes hospital, St. Louis, where young Wadlow has been examined frequently, termed him an ideal subject for study of the growth hormone secreted by the pituitary, which in his case apparently got out of control.

Indications are that the boy will be a big man, the physician added. "We surmise that his growth may or may not reach nine feet or over."

Electrical devices now carried on handcars quickly measure strains in railroad rails.

In the Hawaiian Islands, white violets grow on stalks four feet high.

### New Device Kept Secret

#### Radio Spy Owned By U.S. Navy To Be Tested

United States navy department officials disclosed the development of a "radio spy" by which enemy warships can be located or tracked long distances at sea.

Rear Admiral Harold G. Bowen, engineer-in-chief of the navy, first reported development of the device by the department's radio direction-finder experts to congressional appropriations committees which handle navy funds.

Bowen declined to make public details of the "radio spy," filing such information with the committees under a "confidential supplement."

Navy officers, while saying the development was "secret" and could not be discussed, added that it was possible it would be given its first comprehensive test in naval manoeuvres to be held in the Alaska-Hawaii sector in the Pacific this year.

Under the same "confidential supplement" Admiral Bowen also requested funds for the development of a system of cryptography by which warships can transmit signals to another vessel in the fleet which cannot be deciphered by an enemy vessel.

### Valuable Letter Sold

#### Written By Kipling When Edward VII's Coronation Postponed

A letter describing the gloom in England when the Coronation of Edward VII was postponed because of his sudden illness was among a group of Rudyard Kipling's letters which went on sale in New York.

The letter from the poet to his American mother-in-law, Mrs. H. Wolcott Balestier, of Vermont, is dated June 26, 1902, scheduled date of the Coronation for which England had prepared elaborately.

The day before he wrote, Kipling, who with all Englishmen of his day revered the popular Edward, had learned of the King's illness and the postponement of the ceremonies.

"The only thing I can compare the general effect to was being on a gigantic motor car with all the brakes suddenly applied at once. . . all flags of course were hauled down and all sports stopped," Kipling wrote, "the little telephone boy was blubbering and it looked as though a gray sponge had been passed over the faces of all people. . . to-day the land seems stunned. . ."

### Australian Gunner Honored

#### High Officials Attend Funeral Of Soldier Killed In London

Gunner Arthur Percy Sullivan, V.C., Australian soldier whose sudden, accidental death has saddened London, was honored in a colorful funeral service at the Guards Chapel, Wellington Barracks.

Sullivan, a member of the Australian military contingent in London for the coronation, was killed by a cyclist on Birdcage Walk, outside Wellington Barracks where the soldiers were staying.

An immense turnout of soldiers and civilians, including the Australian high commissioner, Stanley Bruce, and high official representatives of many governments, attended the funeral.

Sullivan, manager of a branch of the Australian Bank at Manly, New South Wales, is survived by a widow and four children. He won the V.C., the Empire's highest award for valor—in 1919 when he rescued four comrades from a northern Russian swamp under heavy fire.

### Look And Listen

#### Drivers Should Exercise More Precaution At Railway Crossings

It is simply impossible in a young country like Canada, with more than 40,000 miles of railway, to eliminate all grade crossings. The best that can be done is by plain signal warnings to protect the public. At the same time, the most dangerous of these that the travelling public must give heed and protect itself in the meantime.

If it were not for the sun's attraction, Jupiter would, because of its size, kidnap the other planets and add them to the flock of nine moons which already circle about it.

The nine of diamonds is called "the Curse of Scotland" in that country.

More than one-half of the flowers in the world are some shade of red.

### SELECTED RECIPES

#### ALMOND CHEWS

Temperature: 350 degrees F.  
Time: 1 1/2 hour.  
1/2 cup butter  
1/2 cup sugar  
1/4 cup "Crown Brand" Corn Syrup  
Yolks of 2 eggs  
1 teaspoon baking powder  
1 1/2 cups bread flour  
1/4 cup Benson's Corn Starch  
1/2 teaspoon salt  
1/2 teaspoon vanilla  
1/2 teaspoon almond flavoring  
1 cup almonds

Cream the butter; add the sugar and "Crown Brand" Corn Syrup. Blend well. Add the yolks of the eggs, which have been beaten until thick and lemon colored. Sift together the flour, Benson's Corn Starch, salt and baking powder and add to the first mixture; blend. Add the flavorings. Pat into shape in a greased pan 9"x12" and on top spread the following meringue.

### MERINGUE

Whites of 2 eggs  
1/4 cup "Crown Brand" Corn Syrup  
1/2 cup brown sugar  
Stiffly beat the whites of the eggs and gradually add the brown sugar and "Crown Brand" Corn Syrup; beat again until the mixture peaks. Sprinkle the meringue with almonds which have been blanched and chopped. Bake 1 1/2 hour.

### Increase In Pensions

#### Total Number Disability And Dependent Pensions Given \$5,975

Total number of disability and dependent pensions in force at the end of the last fiscal year, March 31, was 97,975, an increase of 975 over the figure on the same date in 1936, departmental officials disclosed. The amount of money involved was \$40,783,023 per annum, or a drop of \$71,451, notwithstanding the increase in numbers of pensioners.

Approximately 8,450 pensioners were paid to Canadians or their dependents resident in the United Kingdom, while about 8,560 was paid to disability pensioners or dependents in foreign countries. In round figures 81,000 pensions were being paid in Canada, of which 67,524, representing \$25,857,407, were disability pensions and the remainder, representing \$7,725,998, dependent pensions.

### Proper Fare For Reducers

#### Tests Show Coffee And Doughnuts Do Not Increase Weight

Take the word of Dr. Howard J. Crum, coffee and doughnuts is proper fare for seekers of slenderness. Years of experimenting with reducing diets have proved the time-honored combination to be "most satisfactory," he told the Southern Beauticians' Association at New Orleans.

Dr. Crum, plastic surgeon and beauty consultant of New York City, conceded a majority opinion of the diet-conscious population would ban coffee and doughnuts from the table as producers of weight but, he added, "this is not so."

Some elephants produce soft ivory; others produce hard.

### Exhibition Of Needlecraft

#### Work Of Queen Mary Likely To Be Shown

World-famous women will be asked to contribute their own handiwork to an international exhibition of modern tapestries which it is proposed to hold in Sydney, New South Wales, early next year, as part of Australia's 150th anniversary celebrations.

Among them will be Queen Mary, who is a skilled weaver of tapestry pictures, and to whom a cablegram has been sent requesting her to lend a sample of her work, to be a feature at the exhibition. Another who has been asked to lend her work is Mrs. Franklin D. Roosevelt, wife of the President of the United States.

The suggestion for the exhibition, and that noted personages should be asked to send their tapestries for display, was made by Lady Gowrie, wife of the Governor-General of Australia.

Australian tapestry weavers will be invited to join in interdistrict competition, and the winning pieces will be included in the display.

### Dies During World Cruise

#### Col. J. Obad Smith Was Former Officer Of Immigration Department

Lieut.-Col. J. Obad Smith, 73, former chief officer of the Canadian government immigration department in England, died in Yokohama, Japan, according to cable advice to Canadian Pacific Steamships at Montreal. Col. Smith was on a world cruise on the Empress of Britain.

A native of Birmingham, Eng., Col. Smith came to Canada after graduation from Liverpool college. He was called to the bar of Manitoba in 1891 and served with the Manitoba government until 1901 when he became Dominion immigration commissioner for western Canada.

Col. Smith retired from the service in 1924 and was appointed manager of the Hudson's Bay Company's Overseas Settlement Limited. He resided in Richmond, Surrey. He leaves his widow, daughter of the late Harry Barton Rose of Winnipeg, and two daughters.

Client: "I'm charged with stealing a case of brandy, sir, and I'd like to know if you'll take the case."

Barstler: "Certainly! Send it round to this office as soon as you can."

The United States and China produce the largest amount of poultry.

### Nerves At Breaking Point

NO need for girls

suffer from periodic pains, headache or sickness. Many find that Dr. Pierce's Favorite Prescription is a very beneficial tonic. "This is what I took," says Mrs. J. L. Lutz of New York City.

"Years ago I was in a run-down, weakened condition, my nerves were at the breaking point, the least little thing irritated me and I could scarcely eat. I took Dr. Pierce's Favorite Prescription and my appetite improved and the headache, and other troubles disappeared." Buy now!

## THIS BACKACHE IS AN AGONY

**KIDNEYS WILL CAUSE IT!**  
Sluggish kidneys let poisons accumulate in your system. Lame back, lumbago and rheumatism often follow. GIN pills will give the kidneys the help they need to filter out the poisons that cause the pain. "Prove their merit through their use!"

**GIN PILLS**  
FOR THE KIDNEYS

## THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside  
By PATRICK SLATER  
By arrangement with Thomas Allen, Publisher, Toronto.

### CHAPTER III.—Continued

My mother begged for the priest. He put the holy oil on her, and her mind was comforted.

"Sit over by the window," Mistress O'Shea said to me. "Your mother doesn't want you to be looking at her, Paddy. She doesn't want you to remember the look of her face in the sickness."

The dip candle stuck in a bottle guttered and spent itself during the watches of that terrible night. The agonies of the destroying disease were distressing.

As the sky began to brighten with the dawn, the stifling collapse of the disease overcame my mother's body. Mistress O'Shea crossed herself as she covered the rigid face.

I hoisted the window to let the soul get out.

Two rough-looking men with a one-horse cart came in the forenoon to take my mother's body away. They were gathering bodies of the Catholic poor for burial in a potter's field at the east side of the city. They had started off with a load of empty board coffins, and Mr. O'Hagan's place was the final call on that trip. They placed an empty coffin on the street. They came upstairs with a heavy bag made of ducking.

I knew my mother was not yet dead because only one eye was closed. But they shoved her stiff body into their bag and tied the mouth of it with a stout cord. One of the men shouldered the burden and bore it to the street. The lid of the coffin was hammered on. It was hoisted up into its place on the cart. The cart trundled off up York Street. And I followed after.

As we rounded the corner of Richmond Street, Dick Crispin was opening the bar-room door of his yellow tavern. Mr. Crispin had been in service with Sir John Colborne, the governor, and his public house was much frequented by official gentry from below stairs. The carter holloed to him for a drink. Coachman Dick brought out a generous flask of whiskey, and set it on the roadway. The body gatherers drank to the souls of the departed, and emptied the bottle. Of course, they had been tight already. But they were brave men, doing a necessary and dangerous duty. Drinking heavily was the only precaution they knew.

It was a curious funeral procession that wended its way along Richmond Street, up Church, and east on Queen Street—an old cart full of corpses, two drunken carter, a dirty, ragged little urchin, with tear-stained face and a bob-tail collie that did not understand. The road cleared in front of us; and people closed doors and ducked up alleys as we passed along. Anyway there was one sincere mourner present, which is more than some great funeral processions have. The whole affair had been sudden, and it seemed terrible to me. I felt sick. There was a strange cumbering in my belly. The essence

## LOOK OUT FOR YOUR FIGURE

Protect Yourself Against Modern Living That Brings Excess Weight.

Lack of exercise, irregular hours, excess eating, smoking and drinking are taking their toll these days. Lovely curves soon become bags of fatty tissue. Here is the way to guard against this. Keep your liver strong and healthy, as it protects you from fatness, excess weight, poor blood, lowered vitality. If your liver isn't working properly, your arteries, skin and internal tract soon become affected. "Fruit-a-lives," containing extracts of fruit and herbs, help nature to keep the liver strong and healthy. Thousands have found "Fruit-a-lives" the sure way to banish the effect of modern life and safeguard their figure. It also keeps headache away and tones up the system. "Fruit-a-lives"—to-day, 25c and 50c at all drug stores.

of true sorrow is always self pity. I was not so much sorry for my poor mother. I felt helpless and utterly lonely; and I was sorry for myself because they were taking her away from me.

I followed along after the cart, blubbering and poking my grimy knuckles into my eyes. Rover knew I was in distress, and he wanted to help me.

I was bothered that the old cart made so much noise. They might be hurting her.

I got to thinking that prayers should be said for her. I sobbed out what I could:

Hail, Mary, full of grace!

Blessed art thou among women, And blessed is the fruit of thy womb, Jesus.

The cart rattled onto Queen Street.

Holy Mary, Mother of God, Pray for us sinners, now and At the hour of our death. Amen.

May the souls of the departed Rest in peace. Amen.

They put the load of bodies into one great hole. The cold of the grave was in my heart.

When I got back home, they were fumigating the house and Mr. O'Hagan told me to clear out—I was not wanted there. I asked for my mother's things. They had all been burnt—so he said; but I didn't believe him.

"And there," I accused him, "you liar, you have my father's own stick in your hand!"

Mr. O'Hagan chased me out onto the street and threw the stick after me.

I faulted him roundly in Irish and I ran to pick it up; and the man crossed himself.

"What were you saying to the man, little boy?" an old gentleman enquired of me.

"I was putting a curse on him," I explained. "I was blasting his soul to the devil for a dirty, lying thief."

I still keep that stick by me, for I hold it very dear. It reminds me of the old, unhappy, far-off days when my father died "evie" and left me as his whole estate his Irish blackthorn stick.

So not a stitch nor token have I to remind me of my mother. But when the sunbeams strike down and den-like through the storm clouds, I think of the glint in her fun-loving eyes. And when the rain thrush flutes his neat little tune to the clearing sky, I hear again the soft, lovable brogue of that poor, little, forgotten, black Irish mother of mine.

When night set in, I slipped down the alley to the east of the Tavern Tyrone. Rover whined a welcome from the stable door. It is a quality of a dog's friendship that he knows all your secret faults, yet remains loving and kind to be sure; and he will never spitefully use you. I was sick and tired as a child is after hysteria of any kind; and I was actually weak, because I had fasted the livelong day, which is sore against the grain of a little boy's belly. I laid me down in the sweet, crisp hay; and Rover snuggled over beside me. In my utter loneliness, the dog's sympathy and loving-kindness refreshed me; and my body felt warmer. Sobbing, I fell asleep.

### CHAPTER IV.

Early in the morning, Himself woke me right smartly by dashing a bucket of water into my face. He was in the devil's own temper; and he had me cornered. Yet he stood back in the doorway with his chin hoisted in the air, like a he-goat on a hillside. I thought I was in for a beating; but fear of the plague kept him from laying hands on me. I got a tongue-lashing instead.

Mrs. Trueman came out of the kitchen to see what all the noise was about.

"Dear! Dear! What can the matter be?" exclaimed the good woman. "Is it a twist of the colic you're having, John?"

She found her husband calling loudly to his Heavenly Father to show cause why John Trueman's premises should be infested at night with stray cats and dirty little gutter-brats, messing the place up and spreading disease.

"Why, Lord a Mercy!" Himself exclaimed. "Woman! it's matter enough!"

The excited man, roaring helplessly at a cringing little urchin, may have felt unignited in the presence of his wife. Off he strode into the house, making strange noises by blowing through his closed lips and tossing his head about with his left hand. I was glad to see the heels of him.

Sarah Trueman looked me over. I must have been a miserable-looking little wail. All I had on was my ragged pants and a portion of a blue shirt; and one of my shoes was sole-

less. Well do I remember the peculiar moment in which I was received into the Trueman household—poor and penniless, neither naked nor clothed, barefoot nor shod.

"Paddy, what have you been doing here all night?" she asked me in her quiet, gentle way.

"Sure, Mrs. Trueman," said I, "my mother died from me, and I'd no place at all to go."

"You poor child!" she exclaimed, "just bide where you are."

A wooden wash-tub was landed out into the stable. The Trueman girls fetched out, hanging on a stout pole, a large black iron pot of boiling water. I was sent with a pail to the rain barrel.

"Now scrub yourself, Paddy," Mrs. Trueman directed me, "and make a job of it."

Rain water and soft soap are great for a lather; and I did my duty. Half a cup of carbolic acid was added to the tub before I got through. Then I was set to washing my pants and shirt in the curdled water. Old clothes and a pair of boots belonging to young Jack were handed out to me. A pail of unslacked lime in chunks the size of hens' eggs was sprinkled on the stable floor.

I was given my breakfast in the back kitchen. There were no lumps in the porridge the Trueman girls made, nor was it a sloppy gruel of a lazy housekeeper. Fresh eaten meal was boiled for many hours, cooking slowly in a vessel suspended in the water of a black pot that hung on its hook over the open fireplace. There was a richness to that porridge and the body of it was such that it would jelly as the heat left it.

A big bowl of it was given me; and over the top Violet Trueman poured maple syrup as thick as molasses. I could feel my bowels stirring and stretching up within me and yearning for it. I gave it two or three turns with my spoon to let the sweetness sink into the heart of the delicious mass. Then I smothered it with cows' milk, warm from the milk pail. It was a food to sweeten the soul; and it stuck close to the sides of my belly. My spirits have always risen with good eating as some people do with drink.

"Bun-rump!" growled I myself, as he spied me at his porridge bowl. I paid no attention to him.

"She-ases!" he snorted. "No wonder old Job was told to curse God with three hundred of them about his place!"

"Now, father dear," exclaimed his daughter Violet, as she bobbed him a little courtesy, "no one ever faulted Job's beautiful daughters."

His women folk treated John Trueman as something to be put up with, just like the Canadian climate. Then I got a plate of potato cakes, piping hot with butter melting into the richness of their scabby brown bodies. Sarah Trueman was a wonderful cook; anything she put her hands to turned out well. Her potato cakes were compounded of mashed potato and boiled red salmon; and, like all good Irish pasties, were fried in a big black spider with a long handle. The delight that came from the taste of things is one of the thrilling joys of childhood. Old age is a mean, dirty robbery; but, blast him, he can't take away from me the memory of the taste of Sarah Trueman's cooking. The width of the world contained nothing like it. All the digestive juices in my old body start secreting at the thought of it.

Somehow I felt during the meal

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rain!

The liver should pour out two pounds of fluid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sick and the world looks queer.

A mere bowel movement doesn't always get the bile out. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of a colonad but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

that they were talking about me behind my back. William Marshall had driven into town the day before. His wife was the eldest of the Trueman girls and for years the couple had been busy clearing a bush farm up country. He was a youngish looking man in the face, but his body was set and stiffened a little with hard work—a kind and mannerly man he was, quiet and sedate in his ways for the huge bulk of him. The Trueman women were right fond of William Marshall. I could see it in their eyes as they moved about. Casual-like, he came out and spoke to me.

After a while, back he came again, and stood looking me over.

"How would you like, Patrick," he asked me in his slow, deliberate way, "to go out and live in the country?"

"I'd like, sir," said I, "to have a home; and I'd work hard."

(To Be Continued)

### Presented With House

Mansion On Eaton Square Gift To Premier Baldwin

Prime Minister Baldwin, whose residence following the coronation is taken for granted, was presented with his new Eaton Square mansion. The house was described "as a gift from a friend to enable him to keep his large library."

Donor of the house was understood to be Baldwin's son-in-law, Captain Arthur Howard, son of Lady Strathcona. Lady Strathcona, daughter of the famous Canadian railway pioneer, died 11 years ago and left an estimated fortune of \$25,000,000 to Captain Howard, who married the premier's eldest daughter, Lorna.

### Made Bank Teller Weary

Man Deposited 10,000 Pennies And Said He Had More

Ten thousand pennies was the odd deposit made in a bank at Lebanon, Tenn., when William Sellars brought his \$100 deposit into the bank in a well-filled three-gallon pail. After a weary teler finished counting the 10,000 pennies and entered the deposit, Sellars said he had about 8,000 more coppers at home and he probably would bring them in before long.

Eberhard Faber was the first American to make a rubber-tipped pencil. America's first successful pen and pencil manufacturer, he founded his business in 1861.

The greatest number of accidents occur from 1 to 6 in the morning. Almost as dangerous is the period from 4 to 8 in the evening.

Jupiter is bigger and heavier than all the other planets rolled into one.

### SCENES FROM THE MADRID FRONT

Stretcher bearers hurrying to rescue the wounded during heavy fighting in a village on the Madrid front.

### A Quebec Adventure

Two Gentlemen From Toronto Attempt To Cultivate The Bon Accord

Two gentlemen from Toronto, whom we shall call Mr. Bon and Mr. Entente, entertain such lively affection for Quebec that they recently talked themselves into embracing upon a motor trip into the hinterland of that province. Mr. Bon was particularly enthusiastic, as he had some French phrases which he wished to say to someone. Passing upon the road a trudging peddler with an enormous pack, Mr. Bon suggested that here was his opportunity to talk French and to hear French talked and to cultivate the friendship of the kind people of Quebec. Accordingly, Mr. Entente stopped the car and invited the peddler to come aboard, which he at once did, squeezing his pack through the rear doorway.

"Comment vous portez-vous?" tried Mr. Bon, offering a cigarette. The passenger in the back seat grunted, taking the cigarette. "Ou allez-vous?" suggested Mr. Bon, heroically trying to recall conversations out of his heroic past in the Franco-American P.E.T.

The passenger grunted again. Mr. Entente intruded: "You come from Montreal?" he asked the peddler.

"Naw, from Toronto—Spudina avenue."

It turned out that his name was Katzman and he had been born in Poland.—The Printed Word.

### Little Helps For This Week

Giving thanks unto the Father which has made us meet to be partakers of the inheritance of the saints of light. Col. 1:12.

The souls most precious to us may from this hour have fled. But still we make our household hear:

One Lord is still our head, And in the heaven we're striving for.

They mind their Lord's affairs; And if we bring our word to him We find it one with theirs.

We are apt to feel that nothing we do on earth bears any relation to what the good are doing in a higher world, but it is not so. Heaven and earth are not so far apart. Every disinterested act, every sacrifice to duty, every exertion for the good of one of the least of our Saviour's brethren, every new impulse given to the love of truth and goodness, associates us with the departed, brings us nearer to them, and is as truly heavenly as if we were acting, not on earth, but in heaven. The spiritual tie between us and the departed is not felt as it should be. Our union with them grows stronger if we daily make progress with them as they grow.

### A Cruel Practice

Debarbing A Dog Does Not Speak Well For Owner

Let us hope that whatever the unfortunate dog in Buffalo suffered from the operation known as debarbing that the public opinion aroused in opposition to any such practice may save many other dogs from the same experience. We can conceive of no man who really loves his dog thinking for a moment of subjecting him to this operation, and we are in heartiest sympathy with the words of Dr. William J. Lentz, professor of anatomy at the University of Pennsylvania's Veterinary School, who says:

"If a person wants a dog at all, he ought to be willing to take what goes with it. When it gets to a point where dogs have to be debarbed, they're no longer dogs. After all a dog's bark is about the best burglar alarm you could have around your home. If a dog has been properly trained, and is discriminating, his bark means something. I can't understand why people would want to deprive their pets of that natural function."—Our Dumb Animals.

### Sun Starts Fire

A mid-day sun blazing through a plate-glass window was blamed for a \$25,000 fire which swept through a store in Buffalo, N.Y. Firemen investigated the blaze said they believed point, piled in the show window, exploded from the sun's heat, and spread the blazing oil over the store.

### About The Planet Jupiter.

The planet Jupiter has nine moons, and each one requires a different length of time to make its trip around the planet. Some travel more slowly than others, while their orbits vary greatly in size.

Diamonds are not inflammable in air, but will burn at 850 degrees C. if put in pure oxygen. 2200

## Don't Risk Spoiled Bread!

BAKE WITH  
ROYAL YEAST!  
It's always  
full-strength

You get every cake of Royal Yeast in an airtight wrapper... sealed against contamination

To bake a loaf that's sweet, flavored, fine-textured, and truly appetizing, you need a good yeast... one that's full-strength and pure.

Royal is always dependable. Each cake is protected by an airtight wrapper, to insure absolute freshness, full leavening power, purity. It's the only dry yeast with this special protection.

For 50 years, Royal has been the standard. Actually 7 out of 8 Canadian housewives today prefer Royal when they bake with a dry yeast. They know they can always depend on Royal for good results.

Insure yourself against baking failure. Get a package of Royal today.

### Send for FREE booklet

To get uniform results in bread baking, it is important to keep the sponge at an even temperature. The "Royal Yeast Book" gives instructions for the care of dough. Send coupon for free copy of the book, giving 25 tested recipes for tempting breads, coffee cakes, buns and rolls.

### Would Mean Big Saving

Connecticut Adopts Sensible System For Motor License Plates

The State of Connecticut has been paying \$125,000 a year for the license plates for its 400,000 passenger cars. There will be no more of this expensive changing for the new plates will be made of aluminum, and owners will keep them indefinitely. Letters will be in black, and a small colored metal plate, denoting the year, will be attached at each renewal period. Durability, cost, convenience, visibility, prevention of counterfeiting, handling of renewals—all these points have been considered. What's wrong with the new Connecticut system? Why wouldn't it be a good thing for other places, too?—Omaha Messenger.

The core of the earth is as hot to-day as it was when the planet first, took shape one and one-half to three billion years ago, according to belief of a Carnegie Institution scientist.

Geisha, of Tokyo, Japan, are being trained in air-defence, one lesson being on how to carry water to extinguish a blaze caused by an incendiary bomb.

## THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in The Advance are—display, 40¢ per inch for first week and 30¢ for each succeeding week, providing no change is made. The Card Club will be held at Mrs. Turple's home next week.

## New Breed of Sheep for Canadian Farmers

Shown above on their arrival in Canada in the Canadian Pacific Steamships freighter Beaver-brae are several sheep that will mean a great deal to Canadian farmers in the future. They are a gift to the Province of Ontario from the Kerry Hill Plock Book Society in North Wales and are an outstanding breed of general utility sheep, which, due to their adaptability to any environment,

are expected to gain rapid favor in this country.

The gift of the pen of ten ewes and one ram was arranged through the good offices of W. Rupert Davies, president and editor of the Kingston, Ont. Whigh-Standard. These prize winners, products of generations of breeding with the most careful methods of selection being exercised, are destined for the Ontario Agricultural Society at Guelph, from where the strain is expected

to spread to other parts of the country.

An idea of the economic and eugenic value of the gift pen may be derived from the fact that the eleven animals took first prize at the annual Kerry Hill Sheep Fair where some 10,000 to 15,000 sheep were shown. Besides being able to withstand bleak weather, these sheep are handsome and symmetrical, and will, it is felt, prove of great value to Canadian farmers.

## Food Habits As Revealed In Railway Dining Cars

Winnipeg, Man., April—Similarities and differences in food habits as between countries are revealed by food orders received in railway dining cars. On British railways roast beef is the favorite dish and the same holds good in dining cars of the Canadian National Railways. While chicken comes second best in Canada, across the water roast lamb is next to roast beef in popularity. The Scot, when travelling, however, is likely as not to ask for hain and eggs, the Manchester man goes in for hotpots while the West Country man stands by roast beef. For the Irishman is a good old Irish stew. Fish is popular on railway dining cars in both countries. In the case of desserts, the Britisher, like the Canadian, goes in for pie, apple being the favorite variety with patterns in Canadian National diners. As regards beverages, tea is tops in both countries.

## Grasshoppers Laid From Intense Heat

LETHBRIDGE, April 28 (Special Dispatch) -- Entomologists attending the international farm pest conference in this city heard yesterday of heat so intense during the summer of 1936 that heavy mortality among grasshoppers occurred in the central states of the U.S. The insects parched in the trees, the ground temperatures proving too high for them. When rain fell, the survivors descended to the ground and laid their eggs. It is considered unlikely that temperatures in this region would ever rise sufficiently high to result in similar destruction of the pests. Sessions of the conference will be forwarded to Ottawa and Washington and announcements made from there. A comprehensive international campaign against hoppers has been under discussion.

## TRAINMEN DIE

BULLETIN  
WOODS LOCK, Ont., April 26th -- (C.P.)--Word from Ingersoll reached here late this afternoon that Mr. Malcolm Isbister, engineer of the derailed C. N. R. flier, had died from injuries. Deceased was a cousin of Mr. W. W. Isbister, of Chinook.

despatcher and in 1924 was involved in a similar position. From 1924 Mr. Sparling has lived in Winnipeg holding positions of Chief Despatcher, Superintendent of Transportation, Rule Instructor and Inspector of Despatchers, until his present appointment to Edmonton.

## Veteran Railroader Leaves C. N. R. Service

WINNIPEG, Man., April 29  
After more than forty seven years of Railroad service in Canada, most of which has been spent in the west, I. P. White, superintendent of car service, Canadian National Railways, retired to private life a few days ago. Mr. White, one of the "old school" in the railroad fraternity is, in one of the best known car service men on the continent. He was guest of honor at a dinner, prior to his retirement, when his brother officers made fine recognition of his long contribution to railway life in Canada.

Mr. White entered railway service in May 1890 as a clerk with the Canada Atlantic Railway at Ottawa and remained there until 1905 when he joined the Grand Trunk. In August, 1908, he was appointed Car Service Agent with the Grand Trunk Pacific at Winnipeg and has remained in Winnipeg ever since. In 1915 he was appointed superintendent of car service with the Grand Trunk Pacific and, in 1920, he was superintendent of transportation, Canadian National Railways. He was appointed to his present position of superintendent of car service, Canadian National Railways, in 1924.
